Continuation of 3. Applicant's reply has overcome the following rejection(s): 112, 2nd, over claim 20; 112, 1st, new matter, over claims 1-22 and 24-26; 102(a) over Bauw et al...

Continuation of 5, does NOT place the application in condition for allowance because: The specification fails to teach PLANT genes encoding phosphoglucose isomerase, phosphomannomutase, GDP-mannose pyrophosphorylase and GDP-D-mannose-3,5-epimerase, including the full length Arabidopsis GDP-mannose pyrophosphorylase gene; thus 112, 1st enablement and written description requirements are not met. Disclosure of a list of enzymes in a pathway does not enable or provide written description for the nucleic acids that encode those enzymes. With respect to Applicant's arguments about "wild-type plants" the enablement rejection is based on transformation of wild-type plants not being taught, not based on the plants being wild-type after transformation (and wild-type plants, because all that has been done is the transformation of vtc-1 mutants, is essentially all that Applicant has taught). The enablement rejection is not over the ability Applicant to complement a mutant, but to produce plants that have higher levels of Vitamin C; this encompasses more than complementation of a mutant plant.
